Research Interests

International Trade; Quantitative Trade Models; Political Economy; Public Finance; Applied Microeconomics; International Economics.

Education

Indiana University Bloomington *2020–2026*
PhD in Economics

- Fields: Quantitative Trade; Applied Microeconometrics; Political Economy.

Universidade de Brasília (UnB) *Brazil*
MA in Economics

Universidade Federal do Ceará (UFC) *Brazil*
BA in Economics

Academic Appointments & Employment

Oxford College of Emory University *2026–Present*
Postdoctoral Teaching Fellow in Economics

- Teaching-focused appointment in undergraduate economics, with an emphasis on active learning, quantitative reasoning, and close student engagement.

Indiana University Bloomington *Fall 2021–Summer 2026*
Associate Instructor; Graduate Assistant (Research)

- Associate Instructor (Instructor of record) for undergraduate economics courses (typical class sizes 30–75); strong student evaluations; teaching award recognition.
- Research assistantship supporting quantitative trade and policy projects; built reproducible workflows from data assembly to tables and slides.
- Research collaboration with Mostafa Beshkar on projects related to WTO concessions (details available upon request).
- Policy/multidisciplinary collaboration with the Tobias Center via the Disrupted Development research group (details available upon request).

Inter-American Development Bank (IDB) *Jun 2024–Aug 2024*
Graduate Intern (Summer Consultant), Data Analyst

- Built a reusable Boolean query library and documented a workflow for large-scale text extraction for monitoring news and social media, leveraging LLM tools to accelerate iteration and standardize logic.

United Nations (UN) with OECD and Brazil Ministry of Economy *Aug 2019–Feb 2020*
Consultant (Contractor), Social Expenditure (SOCX)

- Built a cleaned and standardized database from Brazil Ministry of Finance sources for OECD SOCX measurement, with technical documentation aligned with international reporting standards.

BFA Investments *Jan 2019–Aug 2019*
Economics and Finance Consultant

- Supported private-sector clients in sustainable energy procurements; coordinated finance-focused research inputs and translated requirements into concise analytical deliverables.
- Produced investment materials and presentations for sustainable energy projects (materials available upon request; primary language Portuguese).

Ministry of Finance (Brazil) *Dec 2017–Jan 2019*
Fiscal Policy Monitoring Economist

- Monitored fiscal accounts and produced briefings for senior management, focusing on risk assessment and fiscal policy implications.
- Tracked commodity and oil price dynamics and developed short-horizon projections to flag revenue and expenditure risks.
- Contributed to internal and public-facing technical notes and briefing materials produced by the Ministry (titles/details available upon request).

Research

Primary Working Paper

External Negotiations and Customs Union Stability *2023–2026*
Solo-authored working paper

- Separates the value of customs-union membership from the unanimous approval of new external agreements.
- Builds a structural model with reciprocal external bargaining and asymmetric applied tariffs, calibrated to five benchmark years from 2004 to 2017.
- In the focal China and United States exercises, Uruguay gains more from bloc bargaining than from bargaining alone, while Brazil and Argentina obtain smaller or negative aggregate effects and face concentrated sectoral losses.
- Presented in Portugal, Brazil, and the United States, including the Midwest Trade and Theory Conference (2026).

Peer-Reviewed Publication

Politics and Public Banks: BNDES Loans to Local Governments in Brazil *2026, Economía | LACEA Journal*
with Mauricio S. Bugarin and Rodrigo Schneider

- Quantitative political economy of development banking in a federative system (Brazil), studying how federal credit (BNDES) is allocated to municipal governments.
- Develops a framework adapting the Strategic Partisan Transfers Hypothesis (SPTH) to development credit, formalizing interactions across federal, state, and local political alignments.
- Evidence from an extensive panel dataset and a Regression Discontinuity Design (close mayoral elections): "double-aligned" municipalities (aligned with the president but facing an opposition-aligned state) have a higher probability of receiving loans.
- Selected presentations: Latin American Law and Economics; Brazilian Econometric Society Meeting (SBE 2025); Econometric Society European Winter Meeting (EWMES 2025).

Work in Progress

Tariff Cuts, External Shocks, and Strategic Inputs: The EU–Mercosur Agreement in a Changing World
Ongoing project

- Studies how the economic effects of the goods-tariff schedule changed between the early negotiations and the agreement's 2026 signature and provisional application.
- Codes Annex 2-A, the product-level tariff schedule, and evaluates it across benchmark economies from 2007 to 2022 in a six-region, 49-sector quantitative trade model.
- Shows that tariff-only aggregate gains are small, while sectoral incidence, external tariff risk, and strategic-input channels are central to the agreement's renewed economic case.

Additional projects under construction
Political economy and spatial agenda

- Allocation of public resources for development evaluation and political incentives. Sequence over the Politics and Public Banks paper.
- Geolocalization of shocks and spatial/resources economics, including geographically distributed effects of external trade shocks.

Policy & Multidisciplinary Collaborations

Disrupted Development Research Group (Tobias Center)
Policy-oriented, multidisciplinary collaboration

- Contributed to the Disrupted Development research agenda through collaborations connected to the Tobias Center, combining economic analysis with policy and multidisciplinary perspectives.
- Group information: disrupted-development.github.io.

Teaching

- Oxford College of Emory University — Postdoctoral Teaching Fellow in Economics.
- Indiana University Bloomington — Associate Instructor / Instructor of record (undergraduate).
- Courses taught (Instructor of Record): ECON B251 — Fundamentals of Economics for Business I; ECON B252 — Fundamentals of Economics for Business II; ECON E252 — Fundamentals of Economics II; ECON E303 — Survey of International Economics; ECON E327 — Game Theory.

Awards & Honors

- W. Phillip Saunders Award — Outstanding introductory economics teaching, Indiana University.
- H. H. Crawford Graduate Top-up Fellowship.
- Susan C. Thrasher Fellowship.
- Daniel J. Duesterberg Award for the Studies of Issues of Public Policy and Improvement of Economic Welfare.
- Tobias Center Research Graduate SAA.
- Capes Masters Fellowship.

Skills & Additional

- **Languages:** English (Fluent); Spanish (Advanced); Portuguese (Native).
- **Coding skills:** R, MATLAB, Stata (Advanced); Python, SQL, Qualtrics (Intermediate); Boolean coding; LaTeX; Excel.
- **AI / workflow:** AI-fluent (agents, personalization, IDE routine); applied development and automation for research workflows.
- **Database experience / data work:** Public Finance (Brazil: Finbra, Siconfi, Sistn, Sadipem, BNDES); International Trade (UN/OECD/GTAP/IMF); Political Data (Brazil/US); Social Expenditure (UN/OECD/STN); Big Data (Brandwatch/LexisNexis); Social and Economic Data (RAIS, CAGED; IBGE/ECLAC/Census); LLM data modeling and collection.
